Hinges must be kept  
clean and regularly  
lubricated.

## 8042 TELESTEP telescopic ladder

- › Can be used as length adjustable leaning ladder, freestanding ladder and stairway ladder.
- › Stable adaptation to uneven floor surfaces or stairs possible.
- › Rungs made of extruded profiles with deep ribbing, and therefore increased slip resistance.
- › Low space requirements for storage and transport.
- › Solid locking device handles made from high-quality aluminium castings.
- › Ergonomic and service-friendly bolted hinges.
- › In the freestanding ladder position, the ladder can be folded together to move it without first having to release the hinge.

### Special advantages of TELESTEP 8042:

The grip discs on the side of the pin joints are ergonomically shaped and ensure easy handling when adjusting the ladder.

To release the joints simply pull the grip discs on the pin joint outwards and place the ladder in the leaning or freestanding ladder position.

The joints engage automatically when the required position is reached. In freestanding ladders position, the ladder can still be closed without re-opening the joints.

The solid locking devices made of cast aluminium for adjusting ladder height are easy to handle and extremely durable.
